

SIPTalk®

Residential & Home Office Service

Join the Voice over Internet (VoIP) digital phone service revolution! XCast Labs' SIPTalk service transforms your cable modem, DSL modem or other broadband Internet connection into an amazing, low-priced telephone service. You receive a SIPTalk telephone adapter that converts your voice so that it can be sent over the Internet using the cordless or corded touch-tone phones you already have.

Add a videophone or use our Video Softphone on your Windows® XP or Vista PC and enjoy full-motion video calls at no extra charge!

SIPTalk provides you with all of the features you expect from traditional phone service plus many new ones such as CallBlast and Unified Communications (UC). The best thing is that you get all of these features for much less than you have been paying your local phone company.

SIPTalk works exactly like the telephone service you have in your home or home office today. Just pick up the phone, dial any number in the world and SIPTalk connects you with quality as good as or even better than you've experienced in the past.

XCast is not a reseller of anyone else's service. We develop, own and operate every aspect of our technology. Our many years of experience in both traditional telecom and VoIP has resulted in unique, patented technologies that offer you a broad array of fully integrated, reliable and scalable services at lower cost than our competition.

Great Calling Plans at Great Prices

SIPTalk® Features Include:

- ◆ Keep your current number—we cover almost everywhere in the US
- ◆ 100% 911 coverage
- ◆ “Number for life” from over 10,000 cities in the US plus over 60 countries around the world
- ◆ Unlimited free incoming calls
- ◆ Unlimited free on-net calls with other SIPTalk customers, no matter where they are
- ◆ Complete Unified Communications (UC), including voicemail, videomail and faxes delivered to email; voicemail alerts via SMS; voicemail via RSS feed
- ◆ CallBlast, a powerful combination of traditional call forwarding and find me / follow me
- ◆ Enhanced Caller ID (Caller Name)
- ◆ 3-Way calling
- ◆ Call waiting
- ◆ Call blocking
- ◆ Do Not Disturb (DND)
- ◆ Message Waiting Indicator (MWI)
- ◆ Speed dial
- ◆ 7-digit local dialing
- ◆ Online end-user control panel (VCP) where you can view/download calls, turn features off and on, configure CallBlast, change 911 address, etc.
- ◆ Plug-and-play videophone service as well as fully compatible, private-labeled Video Softphone
- ◆ Support for a wide range of IP devices—ATAs, EMTAs, SIP phones, videophones and softphone applications
- ◆ IP-Fax and IP-Tollfree services at very low incremental cost
- ◆ “Virtual” numbers (additional phone numbers that ring on your SIPTalk line, and can be from anywhere we offer numbers)
- ◆ Electronic billing and payment
- ◆ Great international rates

Customer Experiences

I'm very impressed with the service I've received, and the most amazing part is the money I'm saving! I'm now paying one third of what I used to pay Verizon, and I get all the same features! I just wish I had switched companies a long time ago.

Celestine C.
Indianapolis, IN

I use CallBlast all the time to forward my client calls to my mobile phone. That feature alone is a remarkable time-saver for me. It lets me be away from my desk most of the time and still take every call “live” that I want to.

I have a second line we use for our home number, and I love the videophone—I can see my friends instead of just talking into a piece of plastic.

Kelly R.
Portland, OR

I use SIPTalk for both my home office voice line and for my fax machine, and it works much better than my previous VoIP provider did. My fax machine is my business lifeline, so I can't afford to use an unreliable service. In addition, I save about 50% over what I would be paying AT&T for the same two lines.

Orrin C.
Los Angeles, CA

Using SIPTalk for my home office is the best decision I've made in a long time. My productivity is way up, thanks to CallBlast and voicemail-to-email features. I can always be reached, no matter where I am. I also like how I can use the web portal to manage the features I want rather than waiting for 'the phone company' to get around to it.

When my phone arrived, I read the simple directions, plugged it in, and was using the service within about five minutes. It works as promised!

Ron T.
Lane County, OR
